It might be supposed that a deaf and dumb man and wife would not quarrel; but Mr. and Mrs. Goodwin of Greensburg, Ind., deaf mutes, lived four years in noiseless disagreement, and finally had a desperate parting fight, in which he was scalded and her skull was fractured.

The Boston Police Commissioners, a whom is vested the power of licens-ng shows in that city, have decided to admit no performances by chil-dren. The case at issue was that of a juvenile "Uncle Tom's Cabin" comany, A Massachusetts statute au-horizes such a prohibition.

Many of the mines on the moun-ins around Leadville, Col., have spended work for the winter, being suspended work for the winter, being inaccessible in consequence of snow. A curious experiment was made with cats recently in Luttich, Germany. Thirty-seven of them were put into bags and taken several miles into the country, where they were released. Within three hours the first cat had found its way home and first cat had found its way home, and before twenty-four hours had elapsed, every one of the others had returned.

Robert Silman, a criminal, was taken from his house by a mob at Georgetown, Ohio, and a rope placed around his neck. Then somebody produced a jug of whisky, and invited the party to drink before hanging the man. The invitation was readily accepted, and a wild carouse ensued, during which Silman escaped.

Tray to boggin is the new rainy day country house pastime in England. You take a substantial large wooden tray to the top of a flight of stairs, sit in it, held on well to the sides, and let yourself go. If you manage well, you alide right down; if you don't, you twist and are tumbled over. Ladies are said to do it best.

Two negroes fought a real duel at Sadieville, Ky., recently without any of the akulking that usually characterizes white men's meetings of that sert. They quarreled about a woman, of course, and agreed to settle their differences with revolvers. They took their places at a distance of ten paces, and fired three shots apiece. At the last exchange one was mortally wounded.

The tax collector of San Francisco, finding it impossible to collect taxes on a Chinese hospital in that city, levied on a wooden god or ido! that he found in the building. The speed with which the terrified Chinamen produced the money and restored the god to its place showed plainly that it was a deity of considerable influence on Chinese fortunes in the next world.

Giuseppina Raimondi, from whom Garibaldi is seeking a divore, has written to a Milan paper, denying that she was pregnant or a mother at the time of the marriage in 1859. The oft-repeated allegation was invented, she says, as the only means of obtaining a decree of nullity of marriage; but, though she desires the dissolution of the abnormal tie, she cannot allow

Benjamin Devries, on of the wealthiest men of Columbus, Ohio, became anddenly possessed of an impulse to get off the street car in which he had truted for his office. He wandered to St. Louis, he says, and for a week was only vaguely concious of who and where he was. ## A SIGHT WORTH SEEING,

The Authors' carnival which was held in the Mechanics' pavilion last week and the week before was well worth seeing. The amount of work which the managers and participants must have gone through in order to perfect themselves in their several parts and make a show worth seeing was simply immense. The arrange-ments were fine, and the success complete. The west end of the vast hall was fitted up as a stage and smaller ones extended on each side the whole length of the building. In the southeast corner a miniature China was laid out with real water running about in ministure rivers, among fields of real ground, with real China houses, etc. A winding path led to an archery station behind the scenes. In the north-east corner the Shakespeare booth was located, where the legitimate drama was to be seen every evening. In the small stages tableaux were given every es, but no one could tell where the next one would be and there were often several curtains up at one time. The greatest sight of all, however, was the wast growds of people. Ten thousand people were in the building at one time and the jam was almost complete. To move about was very difficult, and to hear what any of the actors was saying were impossible. The costumes were very fine and the scenery striking. Many of the most able people of the city attended.

NOMINATION FOR THE VICE-

There is one name that we have no yet seen put forward in this connection, and the GAZETTE respectfully fits it to the consideration of the Republican party. We suggest the name of Senator C. C. COMO DISTRICT.

Surroundings—Rich and Permanen Mines—Re-Locating the Town Site

ED. GAZETTE:-The Como minin district which is now so much talked about, is about twenty miles south east of Virginia City. The road is an excellent one, having from Dayton an easy and regular grade all the way to the summit, but the dismal. bleak walls of basalt, and the fantastic pyramids of scorise and other volcanic vestiges which flank the way on either side, are neither picturesque ner encouraging. Upon emerging from the plutonic chasm into the bright sunlight and pure air of the elevated mesa, the scene is one of enchantment and granduer. Away to the northwest Mount Davidson lifts his isolated crest, the silent guardian of the bonanza. Virginia City, Gold Hill, Silver City, Dayton and Sutroville are a splendid panorama seen from our lo-cal'ty, while circling far away to the south and west the white domes of the Sierra glitter in the sunlight with indescribable splendor. The eastern horizon is scarred and marred by the horizon is scarred and marred by the black trachytic cope of the diamond ranges. There is a marked and encouraging change in the lithogical conditions of our immediate surroundings. Instead of the weird unsightly volcan ic masses of the deep canyon, the entire bed of the broad plateau is composed of porphyry, diorite and other recks identical with those of the Comstock. The surface lands of our district are by no means level. On the contrary the entire mesa is corrugated by elevated ridges and deep depressions and canyons. The outcrop of the Como lode indicates a strong and permanent ledge. Although the work accomplished in the way of development is very superficial and imperfect, yet, sufficient has been dense to prove that the ledge in our immediate vicinity is surprisingly

RICH IN PREE GOLD AND SILVER.

If Virginia City can boast of its Mount Davidson and of its wonderful ore channel, the Comstock lode, trending down deep beneath its giant shadows, so we are able to boast at Como of our Mount Lincoln and our Como lode which is 540 higher than Mount Davidson. We have here within a reasonable degree the certainty of the permancy and reliability of metal bearing lodes, the topographical, geolo-gical and lithological structure is the name as that of the Comstock. In Nevada where the surface was every where distorted and corrugated by the tremendous eruptive forces, vast sums of money might be saved and innu-merable disastrous failures might be avoided by simply noting the trend and position of the volcanic dykes and of the eruptive ridges which were unquestionably the direct cause of the faultings, defections and other perplexing disturbances so frequently encountered in the quartz veins of the great basins of the state. If a miner can ascertain with reasonable certainty the cause of local disturbances or a fault in a quartz vein, he may fre-quently succeed is gaining an appar ently lost lode, and save from abanently lost lode, and save from abandonment an extremely valuable property. The workings of the Comstock show to-day the way the work was performed there. The same may be said of our district. Tunnels like the Wagram which was worked by a French company as early as 1860, are of frequent occurence here. Three or four days ago a party jumped the tewn. I don't mean left it, but relocated over the site where the mill is being built, and served papers upon Mr Welter to that effect. But there is only one who is still rebellious, and he enly clings to enough to bury himself. All the framework of the mill inside and out is erected, and part of the machinery in place. Today one carpenter by the name of Austin fell off the building and was hadly but not seriously burt. Mr. Moore is manager and L. S. Foster badly but not seriously hurt. Mr. Sam Curtis was in Como to-day looking after his mine, the Jacket. There is some talk of having the name of Palmyra changed for that of West Come. The stage is loaded every day with passengers. More anon. Como, Nev. Nov. 23.

Church Social.

The ladies of the Baptist congregation will give a social at the new church to-morrow evening, where they hope to see a'l their friends and their friends' friends. They will have all the delicacies of the season, such as baked beans, brown bread, squash as baked beans, brown bread, squash pies and doughnuts—real, genuine twisted doughnuts, such as your mother used to give you Saturday afternoons when you had been a good boy all week. The beans will be the real thing, genuine hard shells, and if times are hard and your stocks are down you can buy one bean and festival on that. If you are flush you can go through the whole bill of fare, and eat for the good of the cause. Dr. Hutchins will be in attendance in case of accident.

Last Sunday afternoon, in the officof the Virginia Enterprise, John Church, the foreman, got into an altercation with W. R. Carrigan, a printer employed on the Footlight. The two had been on unfriendly terms for some time past. Church came in-to the office on Sunday and finding Carrigan there ordered him to leave. What ensued is thus related by the

Stage.

"Carrigan replied that he wished to converse with some of the boys, when he would leave. Carrigan walked to to another part of the office, and was talking with one of the printers, when Church approached him and requested him to leave the premises at once, following the remark up with a push. Carrigan then endeavored to get out of the office, when Church, who was in-toxicated at the time, clinched him, and in the scuffle that ensued Carrigan was cut in the shoulder and Church received a cut in the side of the head, from falling against a rack used for placing galleys of type upon."

Dute Gray on Another Trip. Dute Gray went back to Camp Bidwell last week to bring home the horse and buggy stolen from W. S. Tolles of Virginia. Two weeks ago he tracked the thief to Bidwell and captured him, but could not bring back the horse and buggy then, as the vehicle was broken. He therefore re-turned to Reno to lodge the thief in jail, and a second trip for the recovery

jail, and a second trip for the recovery of the property was necessary. The capture of the thief and recovery of the horse and buggy will probably cost Tolles over \$200. In addition to these expenses he paid Ben Lackey \$75 for a clue which proved to be of no value. The horse is highly prized by Tolles, whe says he would not lose him for \$1000. Gray will be back with the team next Friday. He deserves great credit for the pluck deserves great credit for the pluck and perseverance he displayed in the

Little Rough on Nevada Senators This good story is told at the exense of the Nevada Senate. A certain Senatorfrom aremote corner of the State, whose intellect and acquire ments were not of a high order, was elected for a term in that honorable ody. He was surprised when he received the nomination, and more so when he found himself elected The first day that he filled his seat in the Senate he was asked by some of his colleagues what were his first impressions when he found himself in that position. "Well." he answered at first I wondered how the devil I got a little used to it, and had looked around a while, I wondered how in lattle you other fellows get

Big Beets and Potatoes, John Bickford, of Mound Station as had great success in raising roots. Yesterday he brought three turnip blood beets into town, whose combined weight was 30½ pounds. One of them weighed 11½ pounds. Mr. Bickford says that he has some "Centennial" otatoes this year that "laid over by a large majority" any that had been described in the Journal. Some of his potatoes weighed four pounds apiece, and Gov. Stanford, seeing some of them, took them on to New York as specimens of what could be raised in

his country.

Dave McFarland has the big beets now on exhibition at the bar of the Arcade saloon.
